Provide your eyes with the best - ONLY £49 for OCT & Optomap Retinal Imaging

Why have it?

- OCT scanning uses light waves to take cross-section images of the back of the eye (the retina). ... These measurements help with diagnosis and also provide treatment guidance for glaucoma and other eye-related conditions such as diabetes and macular degeneration (AMD).
- Suitable for all patients.
- Optomap Retinal Imaging - this gives a 200 degree view of the back of the eye - please call 0114 2621955 to make an appointment.

Come and see our latest window display.
We are known for our ever changing
window display.
Our theme this month is Afternoon Tea.

An old photo of Terminus Road - who
remembers this? And does anyone have
any more photos to share? If so please
drop them into the practice or email them
